

NetConfigGuard — Uyumluluk & Risk Raporu

Oluşturuldu: 17.09.2026 14:50 · Cihaz: LAB · HQ Edge Firewall · Vendor: fortinet · Host: 192.0.2.10:443

YÖNETİCİ ÖZETİ

GENEL RİSK BANDI

CRITICAL

En yüksek aktif risk

AKTİF BULGULAR

9

Kritik: 2 Yüksek: 7

UYUMLULUK SKORU

0%

9/9 uyumsuz kontrol

RİSK DAĞILIMI

2K · 7Y · 0O · 0D

Kritik · Yüksek · Orta · Düşük

● Kritik (2) ● Yüksek (7)

AKTİF BULGULAR (9)

ÖNEM	BAŞLIK	KAYNAK / ÖNCEKİ → SONRAKİ	KOD
HIGH	Firewall address object netmask broadened	lab-office-network netmask: 255.255.255.0 → 255.255.0.0	fortinet.config_firewall_address.subnet_object_netmask_broadened
HIGH	Admin session timeout disabled	system admin_timeout: 15 → 0	fortinet.config_system_global.admin_timeout_disabled
CRITICAL	Admin telnet access enabled	system admin_telnet: disable → enable	fortinet.config_system_global.admin_telnet_enabled
HIGH	Network interface management access enabled	port1 mgmt_http: false → true	fortinet.config_system_interface.interface_mgmt_access_enabled
HIGH	Firewall policy source address object changed	10 srcaddr: lab-office-network → all	fortinet.config_firewall_policy.policy_srcaddr_changed
HIGH	Firewall policy service object changed	10 service: HTTPS → ALL	fortinet.config_firewall_policy.policy_service_changed
HIGH	Firewall policy logging disabled	10 logtraffic: all → disable	fortinet.config_firewall_policy.policy_logging_disabled
CRITICAL	Admin account privilege changed	lab-operator accprofile: read_only → super_admin	fortinet.config_system_admin.admin_accprofile_changed
HIGH	Admin account trusted host changed	lab-operator trusthost1: 192.0.2.0 255.255.255.0 → 0.0.0.0 0.0.0.0	fortinet.config_system_admin.admin_trusthost_changed

ÇERÇEVE UYUMU

ÇERÇEVE	UYUM	UYUMLU / TOPLAM
ISO 27001	0%	0/9
CIS Controls v8	0%	0/9
KVKK	0%	0/9

UYUMLULUK DEĞERLENDİRMESİ (9)

DURUM	KONTROL	POLİTİKA	ISO 27001	ÖZET
UYUMSUZ	Subnet firewall address object netmask should not broaden scope fortinet.config_firewall_address.subnet_object_netmask_scope_limit	Fortinet Firewall Address Change Guard	A.13.1.1 A.13.1.3	Address object "lab-office-network" broadened netmask scope, so the netmask-scope-limit control is non-compliant.
UYUMSUZ	Admin session timeout must not be disabled fortinet.config_system_global.admin_timeout_enforcement	Fortinet System Global Admin Security Guard	A.9.4.2 A.11.2.8	Admin session timeout was set to 0 on system, so the timeout-enforcement control is non-compliant.
UYUMSUZ	Admin telnet access must remain disabled fortinet.config_system_global.admin_telnet_prohibition	Fortinet System Global Admin Security Guard	A.6.2.2 A.9.4.2 A.10.1.1	Admin telnet was enabled on system, so the telnet-prohibition control is non-compliant.
UYUMSUZ	Network interface management access should not be unexpectedly enabled fortinet.config_system_interface.interface_mgmt_access_control	Fortinet Network Interface Change Guard	A.9.1.2 A.9.4.2 A.12.1.2	Interface "port1" management access was enabled, so the mgmt-access-control is non-compliant.
UYUMSUZ	Firewall policy source address object must not change without authorization fortinet.config_firewall_policy.policy_srcaddr_integrity	Fortinet Firewall Policy Change Guard	A.9.4.1 A.13.1.1 A.13.1.3	Firewall policy 10 source address changed, so the srcaddr-integrity control is non-compliant.

DURUM	KONTROL	POLİTİKA	ISO 27001	ÖZET
UYUMSUZ	Firewall policy service object must not change without authorization fortinet.config_firewall_policy.policy_service_integrity	Fortinet Firewall Policy Change Guard	A.9.4.1 A.13.1.1 A.13.1.3	Firewall policy 10 service changed, so the service-integrity control is non-compliant.
UYUMSUZ	Firewall policy traffic logging must remain enabled fortinet.config_firewall_policy.policy_logging_enforcement	Fortinet Firewall Policy Change Guard	A.12.4.1 A.12.4.3	Firewall policy 10 logging was disabled, so the logging-enforcement control is non-compliant.
UYUMSUZ	Admin account privilege level should remain approved fortinet.config_system_admin.admin_privilege_integrity	Fortinet Admin Account Change Guard	A.6.1.1 A.9.2.3 A.9.2.5	Admin account lab-operator changed accprofile, so the admin-privilege-integrity control is non-compliant.
UYUMSUZ	Admin account trusted host restriction should remain approved fortinet.config_system_admin.admin_trusthost_integrity	Fortinet Admin Account Change Guard	A.9.2.3 A.9.4.2	Admin account lab-operator changed trusthost1, so the admin-trusthost-integrity control is non-compliant.

RİSK DEĞERLENDİRMESİ (9)

BAND	KONU	GEREKÇE
HIGH	lab-office-network	Compliance v1 marked subnet address object "lab-office-network" non-compliant after netmask scope broadening, so risk v1 emits a higher-priority governance review signal.
HIGH	system	Compliance v1 marked admin timeout non-compliant after disable — idle admin sessions never expire.
CRITICAL	system	Compliance v1 marked admin telnet non-compliant after enable — cleartext credentials over the wire.
HIGH	port1	Compliance v1 marked interface "port1" non-compliant after management access was enabled, so risk v1 emits a higher-priority risk signal.
HIGH	10	Compliance v1 marked firewall policy 10 non-compliant after source address (srcaddr) change — permitted traffic origins changed, may allow unintended hosts.
HIGH	10	Compliance v1 marked firewall policy 10 non-compliant after service change — permitted protocols/ports changed, may broaden the attack surface.
HIGH	10	Compliance v1 marked firewall policy 10 non-compliant after traffic logging was disabled — matching traffic is no longer auditable, creating a forensic blind spot.
CRITICAL	lab-operator	Compliance v1 marked admin account "lab-operator" non-compliant after privilege change, so risk v1 emits the strongest review-needed signal.
HIGH	lab-operator	Compliance v1 marked admin account "lab-operator" non-compliant after trusted host change, so risk v1 emits a higher-priority review signal.
